Home Health Monitoring Technologies Forum

November 6, 2018

8:00 am – 5:00 pm*

DoubleTree by Hilton
Edmonton, AB

*Times may shift

For questions related to this event, please contact:
Lindsay.Prazak@ahs.ca

Join delegates from across the province for this full-day Forum aimed at exploring solutions for home (personal) health monitoring technologies in Alberta – to improve patient-focused care in our communities.

Through thought provoking conversations, keynote lectures, panel discussions, and interactive demos, we will work together to gather the building blocks needed to formulate Alberta's strategy to select, test, validate, and implement these technologies, and to understand how this will improve both patient outcomes and experience.
